

## **Relief of allergy and hay fever symptoms:**

### **Breathe deeply again thanks to medisana's inhalers**

*Neuss, 08.04.2021.* When the world outside our window starts to bloom, it boosts our vitality and puts a spring in most people's step. But while the majority look forward to the warmer weather, an increasing number of people regard the arrival of spring with mixed feelings – because they suffer from allergies. Symptoms such as watery eyes, a blocked nose or cough can have a massive impact on your everyday life. Many pollen allergy sufferers are no longer able to sleep, work or enjoy their leisure time properly. But even simple measures, such as regularly using an inhaler, can provide relief for those affected by spring and summer allergies. The targeted use of inhalers helps to clear your airways, thus effectively reducing the symptoms of allergies.

medisana's powerful **IN 530 and IN 600** inhalers help to treat disorders of the upper and lower respiratory tract in a targeted manner. In addition to asthma and colds, this also includes allergy-related breathing difficulties. The compact inhalers can be used to inhale various aerosols, which moisten the irritated mucous membranes, thus carrying away allergens and facilitating the typical coughing process. For the targeted treatment of certain diseases, medically prescribed inhalation solutions can also be used. The big advantage of this therapy is that the medication is rapidly administered exactly where its effect is needed, from the nose and throat to the lungs.

Thanks to their innovative micro-compressor technology, medisana's IN 530 and IN 600 inhalers have a high degree of efficiency, and are particularly effective due to their high proportion of respirable aerosols. Their compact size means that they are lightweight and easy to use, while their rechargeable batteries make them ideal for portable use. They also score points with their low-noise nebulisation, as well as the automatic shutdown feature which kicks in when the active ingredient tank is empty. The IN 600 inhaler, which recently received the Plus X Award in the categories of high quality, design and ease of use, also has a clear 4-LED battery charge indicator.

All medisana inhalers are certified medical devices that are subject to strict requirements and regular inspections. They are equipped with a wide range of accessories. In addition to the atomiser bottle, air hose and five replacement filters, delivery also includes an adult-sized mask, a child-sized mask, an angled mouthpiece, a nose adapter and a practical storage pouch or bag. Inhalation can be successfully achieved with either the mask or the mouthpiece, meaning that the inhalers are also suitable for use by children.

The medisana IN 530 inhaler is available in specialist retail stores and at [www.medisana.de](http://www.medisana.de) for the price of € 99.95 RRP. The medisana IN 600 inhaler is available from the same outlets for the price of € 109.95 RRP.
