

**Firmer, more attractive skin in time for summer:  
with the new medisana AC 900 and AC 950 cellulite massagers**

*Neuss, 01.06.2022.* Summer is just around the corner. Finally, we get the chance to let the sun shine on our skin again. And if we can look well-groomed and attractive at the same time, all the better! Firm skin is one of the most important beauty ideals, so it's no wonder that we're fighting a constant battle against cellulite and unsightly "orange peel" skin. Cellulite is caused by the uneven structure of fat deposits under the skin. This is because over time collagen fibres lose their elasticity and less new collagen is created. As a result, the connective tissue becomes weaker and the fat cells have less support. And this is exactly where the medisana's new AC 900 and AC 950 cellulite massagers come in: They provide efficient support for self-massage and treat cellulite for noticeably firmer skin. The massagers promote circulation and effectively massage the various layers of skin in the connective tissue, resulting in an invigorating and stimulating massage experience for the whole body. The cellulite massagers are very versatile and can be used on the legs, buttocks, abdomen, arms and other areas of the body. Both models have two intensity settings and two rotation directions, allowing users to adjust the massager to their individual requirements.

The **AC 900 cellulite massager** comes with a multi-directional massage roller attachment, which ensures a pleasant, even massage experience. It is also easy to use thanks to its ergonomic design and removable, washable attachment. The AC 900 cellulite massager's rechargeable battery enables cordless use.

The **AC 950 cellulite massager** is equipped with three different attachments for the most effective treatment of cellulite: the multi-directional massage roller, bristle silicone brush and silicone brush provide a soothing and effective massage for the various layers of skin in the body's connective tissue and thus promote circulation. As well as offering an invigorating and stimulating massage for the whole body, the AC 950 cellulite massager also comes with practical features such as an ergonomic handle for hard-to-reach areas, removable and

washable attachments, a practical storage bag and a hanging loop. The AC 950 cellulite massager also has a rechargeable battery, enabling cordless use.

The medisana AC 900 cellulite massager is available in specialist retail stores and at [www.medisana.de](http://www.medisana.de) for the price of € 69.95 RRP. The medisana AC 950 cellulite massager is available from the same outlets for the price of € 99.95 RRP.
