

medisana Office Line expanded with attractive products: The heated blanket OL 200, the long heated cape OL 150 and the short heated cape OL 100 complete the range for the office and home office

Neuss, 16.09.2021. The medisana Office Line is growing and in the future will offer three more health and heat products that are perfectly tailored to the office and home office: With the heated blanket OL 200, the long heated cape OL 150 and the short heated cape OL 100, work on computers, laptops etc. and other activities can now be made even more pleasant and health-friendly.

The **medisana heated blanket OL 200** is a cosy heated blanket for the lap and legs. Due to its timeless design, it is perfect for discreet use in the office. Thanks to two large heat zones of 28 × 20.5 centimetres each, the three temperature levels, as well as the pleasant and high-quality material, it guarantees pleasant heat whenever it is needed. Thanks to the power bank, the OL 200 heated blanket can be used easily and wirelessly – flexibly, both indoors and outdoors. It has a hidden pocket for storing the power bank and cables, as well as a practical integrated control panel. When it comes to safety, it is also convincing, because it is equipped with a safety system with overheating protection and an automatic switch-off after 180 minutes. It also has three timer presets and is hand washable.

The **OL 150 heated cape from medisana** is a long heated cape with a smart business look. In its discreet and dark grey, timeless design, it is perfect for wearing in the office. It has three heat zones in the shoulder and back area as well as inside the pockets and three temperature levels each and three timer presets. The pleasant, high-quality material, which can be washed by hand, adds to the wellbeing factor. The long OL 150 heated cape can be used easily and wirelessly thanks to the power bank, flexibly both inside and outside. Like the OL 200 heated blanket, it is also equipped with a safety system with overheating protection and an automatic switch-off after 180 minutes. Its magnetic closure on the front and its hidden pocket for storing the power bank and cable round off the practical functions.

For those who like things a little more compact, the short **medisana OL 100 heated cape** is ideal. It has the same properties as its “big brother”, but is a little cheaper and focuses on the area of the shoulders and the upper back. The heated cape OL 100 is otherwise equipped with the same product features as the heated cape OL 150.

The new products in the medisana Office Line: the OL 200 heated blanket is now available for € 119.95 RRP, the OL 150 long heated cape for € 139.95 RRP and the OL 100 heated blanket for € 99.95 RRP at specialist retailers and at www.medisana.de.
